1 Javascript Functions

1.1 Purpose of this Document

This document lists and details all javascript functions as used in the Monster Mash project by Group 17 for use as reference by coders and documenters during implementation of the system and integration with the database.

Returned data and variables are not shown in this document, since this document is made to be useful to programmers writing the database and allows them to dictate what data is fit to be returned as is useful to the entire system.

1.2 Function Table

Page	Function	Parameters	Description
Profile	getMonsters	None	Request a list of monsters
